

**Prefab cables are used by the following target groups:**

- Installers
- System integrators
- Data centers

**Advantages of prefabricated cables:**

- Connectors are turned on and tested in a cleanroom production environment
- Includes an individual test report on insertion loss and a 5-year warranty
- No investment costs for welding or testing cables
- Up to 80% less installation time
- Connectors are protected by a special tube during installation

We have prefabricated cables in stock in lengths from 10 to 300 metres, in OM3, OM4 and OS2. These are Loose tube indoor/outdoor cables with 4, 8 or 12 fibers. All other sizes and types are custom made and have a very short delivery time.

**ACT 4 Fibers prefab indoor/outdoor cables OS2 Monomodo 9/125 with LC connectors**
