- Monitor arms
- Laptop stands
- Monitor risers

ACT

CREATE AN ERGONOMIC WORKPLACE WITH THE MONITOR ARMS, LAPTOP STANDS AND MONITOR RISERS FROM ACT

The era of hybrid working has begun. This new way of working must meet a number of conditions. In the context of occupational health and safety and prevention, the most important condition is that the flexible workplace is ergonomically designed. The flexible workplace can be at home, at the office or even on location. An ergonomic workplace not only prevents or reduces health risks and hazards, but also stimulates job satisfaction and productivity.

People differ in height, posture and needs and it is therefore important to adapt the workplace accordingly. For example, the distance to the screen should be at least one arm's length. Furthermore, it is important that the monitor of the computer is placed about 50 to 60 cm from the face, and the top edge of the screen should be at eye level.

In addition to the above, it is important to keep a workplace tidy to ensure sufficient workspace. Our ACT ergonomic monitor arms, laptopstands and monitor risers contribute to the creation of an ergonomic work position.

THE RIGHT POSITION

- Distance to the screen at least one arm's length
- Screen about 50 to 60 cm from the face
- Top edge of screen at eye level
- Viewing angle 40-45°

ERGONOMIC MONITOR ARMS: BUSINESS SERIES

BUSINESS SERIES

Stylish monitor arms suitable for a professional workplace. Whether you work with one or several monitors, various options are available for your desk setup. Monitor arms from the business series are always made of quality materials and have an elegant and robust design. Suitable for professional use.

WHAT IS A CROSS BAR?

A monitor arm with crossbar can support 2 monitors, side by side.

Both monitors are placed in one rail, ensuring the screens to be both at the same level and you save space at your desk because you can place the monitor arm up to 14 cm from the wall.

Can be placed up to 14 cm from the wall.

MONITOR ARM SOLID PRO

Movable arms with 3 pivot points for optimal freedom of movement. Extra stability thanks to the reinforced centre pole and arms.

AC8325

Max. weight is 12 kg per arm. With incorporated cable management system: Cables are kept out of sight.

- Type number:**
- AC8325 - for one monitor
 - AC8326 - for two monitors

AC8325

MONITOR ARM CROSSBAR

CROSSBAR

Handy rail system for 2 monitors. Thanks to the crossbar rail, the monitors are always positioned at the same height. The monitor arm is ideal for flexible workspaces because the height can easily be adjusted with a wing nut. This eliminates the need for tools.

AC8322

AC8322

- Type number:**
- AC8321 - for one monitor
 - AC8322 - for two monitors

MONITOR ARM CROSSBAR STAND

GAS SPRING

Crossbar suitable for 2 monitors. Adjustable in height with mechanical gas spring. Easy to adjust effortlessly. Suitable for flexible work places. Aluminium foot stand can be placed on the desk without installation.

AC8332

- Type number:**
- AC8331 - for one monitor
 - AC8332 - for two monitors

AC8332

MONITOR ARM WITH LAPTOP HOLDER

AC8305

AC8305

Movable arms with 3 pivot points for optimum freedom of movement. Suitable for 1 monitor up to 32 inch and 1 laptop up to 15.6 inch.

- Type number:**
- AC8305 - one monitor/one laptop

ERGONOMIC MONITOR ARMS: SOHO SERIES

SOHO SERIE: SMALL OFFICE HOME OFFICE

There are a lot of reasons to place a monitor arm in a small or home office: more workspace on your desk, comfortable viewing and sitting position and a tidy working environment. The ACT Soho series is characterised by an excellent price-quality ratio. Suitable for small or home office.

MONITOR ARM OFFICE

AC8335

Movable arms with 3 pivot points for optimum freedom of movement. Aluminium finish with contemporary look.

- Type number:**
- AC8335 - for one monitor
 - AC8336 - for two monitors

MONITOR ARM OFFICE GAS SPRING

GAS SPRING

Monitor arms can be adjusted individually. Adjustable in height with mechanical gas spring. Easy to set up without any effort. Suitable for a flexible workplace or at home. 2 USB ports, microphone and speaker connection.

AC8312

- Type number:**
- AC8311 - for one monitor
 - AC8312 - for two monitors

WHAT IS A GAS SPRING?

A gas spring makes it possible to mechanically change the height of the monitor arm. In comparison to monitor arms without a gas spring, less strength is needed to adjust the height. This allows you to quickly adjust the height of your monitor arm, ideal in a dynamic environment such as a flexible workplace.

MONITOR ARM HOME

Movable arms for optimal freedom of movement. Various versions available for a home office environment.

- For 1 up to 4 monitors
- Crossbar
- Monitor arm with foot stand
- Monitor arm with laptop arm and monitor arm

AC8320

- Type number:**
- AC8301 - for one monitor
 - AC8302 - for two monitors
 - AC8303 - for three monitors
 - AC8304 - for four monitors
 - AC8315 - crossbar two monitors
 - AC8320 - stand two monitors
